PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 6+ years of experience building SaaS platforms, business applications, data-intensive systems, and AI-powered integrations. Strong backend experience with PHP/Laravel, CodeIgniter, and Python, combined with React, Vue, TypeScript, ClickHouse, and cloud infrastructure. Experienced in LLM API integration, AI-powered search, automated data extraction, third-party API/CRM integrations, database optimization, and automated CI/CD deployments on AWS, delivering high-impact solutions across international remote teams.

TECHNICAL COMPETENCIES

Backend & APIs:	PHP (Laravel, CodeIgniter 4), Python, Node.js, REST API Design
Frontend:	React, Vue, Next.js, TypeScript, JavaScript, Tailwind CSS
AI & Automation:	OpenAI/LLM APIs, AI-Powered Search, Embeddings, Vector Search, Prompt Engineering, AI Automation
Data & Infrastructure:	MySQL, PostgreSQL, ClickHouse, Redis, AWS, Docker, CI/CD, Linux
Integrations & Platforms:	Third-party APIs, Salesforce, HubSpot, Monday.com, Supabase, AWS
CMS & E-commerce:	WordPress, Elementor, WooCommerce

WORK EXPERIENCE

Byteshake Ltd. Dhaka, Bangladesh • Hybrid / Remote
Senior Software Engineer • Backend Architecture & AI Systems Mar 2025 – Present

- Spearheaded backend architecture for **Tenderbase**, an enterprise platform aggregating over **500,000+ tenders** across global public and commercial procurement portals.
- Implemented an AI-powered semantic search and ranking engine combining vector embeddings with ClickHouse indexing to significantly improve user discovery relevance.
- Engineered distributed Python scraping engines with automated proxy rotation, rate-limiting, and resilient **LLM fallback parsers** for dynamic, unstructured supplier sites.
- Optimized high-frequency analytical queries and ingestion pipelines in **ClickHouse**, significantly reducing latency for complex multi-million row reporting.
- Constructed low-latency RESTful APIs using Laravel and CodeIgniter 4 with Redis caching and asynchronous queues for high-performance data delivery.
- Integrated third-party APIs and enterprise CRMs including **Salesforce, HubSpot, and Monday.com** to sync procurement data with client workflows.
- Administered cloud deployment infrastructure on **AWS (EC2, RDS, S3)** with automated GitHub Actions CI/CD to streamline production releases.

CureTech Ltd. Dhaka, Bangladesh • Full-time
Senior Software Engineer • Full-Stack & Automation Jan 2022 – Mar 2025

- Engineered **Tajabajar**, a scalable grocery e-commerce platform handling thousands of critical daily transactions.
- Directed full-stack architecture for comprehensive internal **ERP and CRM systems**, optimizing multi-warehouse inventory logic.
- Developed custom Python web scrapers and data extraction pipelines for automated competitor price intelligence and catalog synchronization.
- Architected secure, high-throughput REST APIs powering mobile delivery management applications with JWT authentication and real-time dispatch tracking.
- Built modern, responsive frontends in React.js and Next.js integrated with Laravel backends for optimized user experiences.

- Developed **Asoug**, a high-volume multivendor e-commerce marketplace from scratch using Laravel, Vue.js, and MySQL.
- Developed **Riadahin.com** and **EventIncu** platforms, contributing to full-stack development, business workflows, and platform functionality.
- Built an automated company data scraping engine in Python to extract, normalize, and enrich commercial records for sales intelligence pipelines.
- Architected relational database schemas and indexed queries handling concurrent shopping carts and checkout transactions.
- Collaborated in an agile engineering team practicing code reviews, sprint planning, and test-driven feature development.

KEY PROJECTS & SYSTEM ARCHITECTURES

Tenderbase – Python, ClickHouse, Codelgniter 4, AI Semantic Search, AWS [\[tenderbase.co.uk\]](https://tenderbase.co.uk)

High-scale procurement intelligence platform indexing 500k+ global tenders. Engineered distributed Python scrapers, AI-driven semantic search, and columnar query optimization in ClickHouse for sub-second analytical reporting.

TapToConnect – Laravel, React.js, REST API, NFC, Redis, MySQL [\[my.taptoconnect.app\]](https://my.taptoconnect.app)

End-to-end SaaS platform facilitating digital identity sharing via NFC technology, featuring advanced admin controls, real-time analytics dashboard, and automated customer contact exchange workflows.

Revuity – React.js, TypeScript, Supabase, Edge Functions, PostgreSQL, Tailwind CSS [\[revuity.com\]](https://revuity.com)

Customer feedback collection and reputation management platform with real-time survey delivery, automated follow-up notification triggers, and customer satisfaction metrics dashboards.

PickGo – Laravel, Vue.js, Real-time WebSockets, MySQL [\[Proprietary System\]](#)

Restaurant order management SaaS with real-time order processing, inventory management, and deep third-party POS integrations.

Asoug.com – Laravel, Vue.js, REST APIs, MySQL, Payment Gateways [\[asoug.com\]](https://asoug.com)

Full-featured B2B and multi-vendor e-commerce platform handling multi-category inventory, individual vendor dashboards, secure payment gateways, and automated order fulfillment pipelines.

EDUCATION

Daffodil International University • Dhaka, Bangladesh

2016 – 2020

Bachelor of Science in Computer Science & Engineering (B.Sc. in CSE)

Focus: Algorithms, Data Structures, Distributed Systems, Database Architecture.

Active competitive programming participant (ACM-ICPC format contests); Member of DIU Computer Programming Club (CPC).

LANGUAGES & REMOTE WORK READINESS

Languages: English (Full Professional Working Proficiency), Bengali (Native)

Remote Collaboration: Experienced working asynchronously with international teams across multiple time zones. Available for 4–5 hours of daily overlap with US, UK, or European working hours.
